

## Your reliable Partner for “Point of Sale” Applications

Stable, durable, and lightweight – these characteristics are the reason why materials like PE or PP are favored for the manufacturing of promotional displays. The decoration requires an ink that will perform perfectly despite the low surface tension of these materials:  
**Ultra Graph UVGX.**

Ultra Graph UVGX can be used on single and multicolour lines and is especially suited for graphic prints like hanging, standing or wall-mounted promotional displays (POS/POP), signs, posters, stickers, etc., for in- and outdoor purposes.

### Applications

All common materials such as polyethylene (PE), polypropylene (PP), PVC, or polystyrene (PS) can be decorated with Ultra Graph UVGX.

Comparison	UVAR	UVGX
Adhesion 1k, based on PP/PE	++	+++
Reactivity	++	+++
Flexibility	+++	++
Odour	++	+++
Outdoor resistance	+++	++
Chemical resistance	++	+

For further information please refer to the Technical Data Sheet on [www.marabu-inks.com](http://www.marabu-inks.com)

### Your Benefits:

#### Outstanding adhesion to materials with low surface tension like PP or PE

→ Very good results starting at 38 mN/m

#### High reactivity

- Fast production speeds
- Highest efficiency

#### Very flexible ink film

- Perfectly suited for all common post-processing steps like stamping, cutting, grooving
- Quality and process safety

#### Minimized inherent smell

- Neutral odour of the ink, during the printing process and from the finished product
- Very pleasant for indoor applications!
